

BumpBuster – The Cushioned Car Door Protection Wall Mat

BumpBuster the revolutionary cushioned protection system for car doors and bumpers

Bumpbuster has created a simple yet unique concept for the protection of car doors and bumpers against accidental damage, dents, chipped paint work and other garaged cars!

The uniquely designed pad, created from high performance materials is placed directly on the garage wall in the position most appropriate for your vehicle.

Designed to be fixed on the garage walls adjacent to the opening edges of the car's doors. Alternatively, it can be used as a bump pad at the end of the garage to protect the car's bumper.

BumpBuster is supplied with instant fixings, so no screws, nails or tools are required. The revolutionary adhesive adheres to brickwork, stud walls, concrete etc – so there is no need to be a DIY expert - anyone can fit a BumpBuster almost anywhere !

Each BumpBuster has a protective area measuring 710mm x 455mm x 30mm (28" x 18" x 1 ¼").

Just think of the money you can save in unnecessary repairs to your car. It takes but a few seconds of lost concentration or by the mere action of over zealous children and your pristine paintwork can be ruined by that ever lurking wall.

It takes just seconds to fit a BumpBuster and once in position it will last for years.

Protect your car, Don't Neglect It!
